The OCEPC and each of the purchasing co-ops in Ohio have renewed their agreement with AEDventure, a LifeServers, Inc. affiliate company, to offer Ohio schools with the very best AED programs available.

- ✔ As part of the renewal, AEDventure has agreed to lower the previous AED pricing and will beat any battery/electrode pricing!
- ✔ On-site service by our professionals ensures your AEDs are up to date and ready to go.

Our two AEDs offered through this program are the two highest energy AEDs on the market with both capable of delivering more than 350 joules of energy.

DID YOU KNOW?

Energy levels of AEDs can make the difference as to whether or not a victim of Sudden Cardiac Arrest survives. Every other AED on the market shocks at 200 joules or less, however, unfortunately too many school nurses and decision makers are unaware of this extremely important feature.

Used at your local fire department and hospital!
