

Here are some updates to our lineup to help schools reopen during COVID.

These 2 products treat COVID in 30 and 45 seconds. Peroxide is used for cleaning and disinfecting non-food contact surfaces, and the Smartpower Sink and Surface can be used to clean and sanitizer food contact surfaces. Please remember most diluted products are a 10 minute contact time to treat COVID. These 2 are real gam changers on how schools should be treating COVID.

These are **EPA registered Hospital Grade Disinfectants with Norovirus kill claims of 30-45 seconds**. These solutions also have Emerging Viral Pathogens claims, making them effective against viruses similar to SARS-CoV-2 on hard, non-porous surfaces. In addition to being able to supply products with the fastest kill claims on the market, I also provide training that will ensure that your staff is using proper procedures, keeping your students safe.

**Peroxide Multi Surface Cleaner and Disinfectant** is approved for use through **Electrostatic Sprayers** to provide an efficient and safe application, with a 45 second kill claim for Norovirus.

Peroxide Multi Surface Cleaner and Disinfectant is a 3-IN-1 multi-surface spray to help make your cleaning process easier. It is an EPA registered product that quickly disinfects (kills 99.999% of germs) in 3 minutes when used according to label directions. **Particularly for Norovirus, its kill time is as little as 45 seconds**. It is also effective against emerging viral pathogens after the CDC has declared an outbreak. This disinfectant does not require PPE for diluted use solution, and leaves a fresh scent.

**EPA-registered: 1677-238**

**SMARTPOWER Sink & Surface Cleaner Sanitizer** is an EPA-registered, concentrated **no rinse 2-in-1 cleaner and sanitizer with a 30-second Norovirus kill claim**. It also has an Emerging Viral Pathogens claim. On food contact surfaces, this is a one-product solution that requires only two steps to clean and sanitize hard, non-porous surfaces while eliminating the rinse step and equipping staff to clean and sanitize more efficiently.

**EPA-registered: 1677-260**

**World Health Organization (WHO) Hand Sanitizer and Dispensers are available for immediate delivery.**

## BULK DISPENSER SPECIFICATIONS

Dispenser\* and Drip Tray only  
S3002809  
\$47.00

Dispenser\*, Drip Tray and Stand  
S3002808  
\$103.00

\*Dispensers require 4 D batteries, not included.  
\* Available direct only.
