Online Ordering with School Specialty

School Specialty Online is a mature, comprehensive easy to use website. Teachers, secretaries, treasurers, and business officials can easily navigate their way through completing a requisition, and submitting through a pre-determined customized workflow that mirrors the way they do business currently. Do not change the way you create and approve orders (unless you want to!), just change the method in which you accomplish those same tasks. When the initial requester (most likely the teacher) creates their shopping list online, everything else becomes that much more correct, secure, and timely. Whether you complete the process online or just come to our website to obtain correct pricing, School Specialty Online makes life easier.

If your district is already ordering online with School Specialty, please continue to use the usernames and passwords that you already have to view accurate pricing and submit orders. Once you log in you will be able to see all discount pricing including EPC pricing on bid items, when you place an item in a cart.

Pricing only username and password

This username and password below can be used by districts that are not currently purchasing online with School Specialty, to see accurate pricing. Simply log in using the username and password and then once you find the item you are looking for, click on see your price to view the correct, discounted price.
